RESEARCH INTEREST

I am mainly interested in quantitative ecology and statistical modeling with a specific focus on spatio-temporal modeling and applications in fisheries science and marine ecology. During my PhD, I developed statistical hierarchical models combining commercial catch declarations data and scientific survey data to infer fish spatio-temporal distribution and identify their essential habitats. The model I developped deals with preferential sampling of commercial data and difference of spatial resolution between the data sources (Change of Support issue).

At the moment I am working as postdoc at University of Washington (Seattle, US) on spatio-temporal population dynamic models to project and address the effect of climate change on harvested population with a specific focus on the Snow Crab of the Bering Sea.

I also have interest in community ecology and inference of dynamic systems (differential equations) to feed my work related to spatio-temporal modeling of species distribution.

EDUCATION

Postdoc January 2023 - present
University of Washington, School of Aquatic and Fishery Sciences and NOAA
Subject: Projecting and addressing climate change for harvested marine populations: Snow Crab of the Bering Sea as a case study.
Key words: spatio-temporal modeling, population dynamics, management strategy evaluation, species life-cycle, projections, sensitivity analysis.
Supervisors: André Punt, Cody Szuwalski, Maxime Olmos.

PhD November 2019 - December 2019
Ifremer Nantes and Institut Agro (Rennes) - UMR DECOD
Subject: Inferring fish spatio-temporal distribution and identifying essential habitats: tackling the challenge of preferential sampling and change of support to integrate heterogeneous data sources.
Key words: spatial and spatio-temporal modeling, hierarchical model, data integration, preferential sampling, change of support, fisheries functional zones.
Supervisors: Youen Vermard, Marie-Pierre Etienne, Mathieu Woillez, Etienne Rivot.
Student mobility: DTU Aqua, Copenhagen, Danemark. Supervision of Kasper Kristensen. August - October 2021

MSc in fisheries science and quantitative ecology 2018 - 2019
Institut Agro (Rennes)
Master thesis February - August 2019
Ifremer Nantes - EMH Research Unit
Subject: Management Strategy Evaluation under stock structure uncertainty.
Application to the common sole in the Eastern English Channel.
Supervisors: Sigrid Lehuta, Youen Vermard.

BSc in agriculture and food science 2016 - 2017
Institut Agro (Rennes)
Student mobility: semester study at University College Cork, Ireland. August - December 2017

TECHNICAL SKILLS

Inference methods	Maximum likelihood, Bayesian inference
Languages	R, C++, Java, Python, SQL
Tools/Packages	Git, LaTeX, TMB, R-INLA, JAGS, Nimble, PostgreSQL

SCIENTIFIC PUBLICATIONS

Peer-reviewed

Alglave Baptiste, Rivot Etienne, Etienne Marie-Pierre, Woillez Mathieu, Thorson James T, Vermard Youen (2022). **Combining scientific survey and commercial catch data to map fish distribution.** ICES Journal of Marine Science. In press. link

Alglave Baptiste, Vermard Youen, Rivot Etienne, Etienne Marie-Pierre, Woillez Mathieu (*accepted*). **Identifying reproduction areas from space-time modeling of catch declarations and scientific survey data.** Submitted in the Canadian Journal of Fisheries and Aquatic Sciences. link

Under review

Alglave Baptiste, Kristensen Kasper, Vermard Youen, Rivot Etienne, Woillez Mathieu, Etienne Marie-Pierre (*in prep*). **Inferring fine scale wild species distribution from spatially aggregated data.** Submitted in the Journal of the Royal Statistical Society: Series C. link

TECHNICAL REPORTS

Alglave Baptiste, Vermard Youen (2022). Ad-hoc contract for the preparation of STECF EWG 22-01 concerning closure areas to protect juveniles and spawners of all demersal stocks in western Mediterranean Sea.

ADDITIONAL REPORTS

Master thesis

Alglave Baptiste (2019). **Management Strategy Evaluation of the Eastern English Channel common sole: management approach under uncertainty.** Master thesis. Institut Agro, Rennes. Specialization in fisheries science and quantitative ecology. link

CONFERENCES

Alglave Baptiste, Vermard Youen, Bez Nicolas, Etienne Marie-Pierre, Kristensen Kasper, Thorson James T., Woillez Mathieu, Rivot Etienne (2022). **Can we trust commercial catch declarations data to map fish spatio-temporal distribution and identify fish essential habitats?** 15th conference of the AFH 'Fisheries research and sustainable development'. June 2022, Brest, France. link

PROJECTS AND WORKING GROUPS

MACCO project: Identification of the target species and by-catch of the Bay of Biscay mixed fishery and evaluation of alternative management strategies. https://www.macco.fr/
Head of the project: Stéphanie Mahévas (Ifremer Nantes).

EWG 22-01 - West Med closure areas (2022): working group aiming at identifying and evaluating the potential closure areas for the demersal species of the Western Mediterranean Sea.

Ifremer working group 'Science with and for society': working group aiming at evaluating the interactions between science and society within Ifremer. It led to several surveys among researchers, post-doctoral and doctoral students and to internal reports for the Ifremer scientific direction.

SUPERVISORY EXPERIENCE

Master May - July 2022
Subject: Contributions of the lognormal Poisson model in multivariate analysis in community ecology. link
Student: Théo Fabien.
Co-supervision with: Marie-Pierre Etienne, Thomas Outrequin and Jean-Louis Marchand.

Master thesis February - August 2021
Subject: Combining commercial and scientific data to infer the space-time distribution of sardine in the Bay of Biscay. link
Student: Florian Quemper.
Co-supervision with: Etienne Rivot and Marie-Pierre Etienne.

Student project (MSc) November 2020 - February 2021
Subject: Investigating the effect of catch reallocation on VMS pings for species distribution model predictions. link
Students: Chloé Tellier, Juliette Theoleyre, Océane Guitton.
Co-supervision with: Marie-Pierre Etienne.

TEACHING

Introduction to spatio-temporal modeling for ecology 2022
Institut Agro (Rennes), 10 hours. slides codes

Practical work in statistics for fisheries science (MSc) 2020
Institut Agro (Rennes), 20 hours.

Practical work in basics of probability theory (BSc) 2019 / 2020
University of Nantes, 24 hours.

GRANT

Grant for the international mobility of doctoral students 2021
Grant obtained from Ifremer for the mobility at DTU Aqua (Danemark).

LAB AND DEPARTMENT COMMITMENT

Amédée seminars: organization of semestrial seminars with a focus on methodological development in fisheries science and marine ecology. https://halieutique.institut-agro-rennes-angers.fr/fr/seminaires-amedee
