RESEARCH INTEREST

I am an applied statistician with a specific interest in spatio-temporal modeling for environmental and ecological applications. I am currently assistant professor in statistics at University Bretagne Sud and Lab-STICC (UMR 6285 - DECIDE team).

I develop statistical methods for environmental and ecological applications that (1) combine heterogeneous and massive spatio-temporal data sources (*hierarchical integrated modelling*), (2) account for non-homogeneous sampling of the datasets (*preferential sampling*), (3) integrate differences in spatial resolution between these distinct data sources (*change of scale/support*), and (4) synthesize the spatio-temporal information available from these data sources (*spatio-temporal dimension reduction*).

Since my PhD, I have developed statistical methods to investigate the spatio-temporal dynamics of ecological species in order to identify hotspots or functional areas for these species and assess the impact of climate change on species spatio-temporal dynamics.

As part of the geography group of the Lab-STICC, I am now working on the interaction of urban landscapes and climate. Our goal is to develop operational tools to assist managers in planning urban areas in the context of land pressure, threats to ecosystems, and climate change.

CURSUS

Associate professor in statistics (CNU 26)

Since September 2023

Research laboratory in information and communication science and technology (Lab-STICC, CNRS UMR 6285), team DECIDE.

Université Bretagne Sud (UBS), IUT Vannes, Data Science department.

Postdoc

January - June 2023

University of Washington / NOAA

Subjects:

1/ Dimension reduction methods for spatio-temporal data.

2/ Spatio-temporal population dynamics models.

Supervisors: Jim Thorson, André Punt, Cody Szuwalski.

PhD: Ifremer Nantes and Institut Agro (Rennes) - UMR DECOD

2019 - 2022

Subject: Inferring fish spatio-temporal distribution and identifying essential habitats: tackling the challenge of preferential sampling and change of support to integrate heterogeneous data sources. [link](#)

Supervisors: Marie-Pierre Etienne, Youen Vermard, Mathieu Woillez, Etienne Rivot.

MSc Institut Agro (Rennes)

2018 - 2019

CPGE Janson de Sailly (Paris)

2014 - 2016

TECHNICAL REPORTS

Alglave Baptiste, Vermard Youen (2022). Ad-hoc contract for the preparation of STECF EWG 22-01 concerning closure areas to protect juveniles and spawners of all demersal stocks in western Mediterranean Sea.

PROJECTS AND WORKING GROUPS

ACLIM: The Alaska Climate Integrated Modeling Project January - June 2023

The Alaska Climate Integrated Modeling project (ACLIM) is an interdisciplinary collaboration to project and evaluate climate impacts on marine fisheries in the Bering Sea, Alaska. [link](#)

Head of the project: Kirstin Holsman (NOAA).

MACCO project 2019 - 2024

Identification of the target species and by-catch of the Bay of Biscay mixed fishery and evaluation of alternative management strategies. [link](#)

Head of the project: Stéphanie Mahévas (Ifremer Nantes).

EWG 22-01 - West Med closure areas 2022

Working group aiming at identifying and evaluating the potential closure areas for the demersal species of the Western Mediterranean Sea.

Ifremer working group 'Science with and for society' 2021 - 2022

Working group aiming at evaluating the interactions between science and society within Ifremer. It led to several surveys among researchers, post-doctoral and doctoral students and to internal reports for the Ifremer scientific direction.

SMAC project - Sole of the Eastern English Channel 2019

Project aiming at investigating stock structure of the Eastern English Channel and adapting management to the available knowledge on stock structure.

Head of the project: Marie Savina-Rolland (Ifremer Lorient).

SUPERVISORY EXPERIENCE

Master student

May - November 2024

Subject: Mapping and profiling French cities based on local climate zones. [link](#)*Student:* Pauline Besnard.*Co-supervision with:* Erwan Bocher.**CDD Ifremer**

January 2023 - June 2024

Subject: Packaging and applying spatio-temporal models to identify fish essential habitats for all French facades.*CDD employee:* Juliette Casemajor.*Co-supervision with:* Mathieu Woillez.**Master student**

May - July 2022

Subject: Contributions of the lognormal Poisson model for multivariate analysis of ecological communities. [link](#)*Student:* Théo Fabien.*Co-supervision with:* Marie-Pierre Etienne, Thomas Outrequin and Jean-Louis Marchand.**Master student**

February - August 2021

Subject: Combining commercial and scientific data to infer the space-time distribution of sardine in the Bay of Biscay. [link](#)*Student:* Florian Quemper.*Co-supervision with:* Etienne Rivot and Marie-Pierre Etienne.**TECHNICAL SKILLS AND PACKAGES**

Inference methods

Maximum likelihood inference, Bayesian inference

Languages

R, C++, Java, Python, SQL

Tools

Git, LaTeX, TMB, R-INLA, JAGS, Nimble, PostgreSQL

Packages[FishMap](#)**SCIENTIFIC ANIMATION**

Workshop on spatio-temporal modelling for ecology

Since 2023

with Maxime Olmos (Ifremer). Biannual meeting bringing together ecologists and statisticians to learn spatio-temporal modeling and its application to ecological case studies.

Space-time seminars

January - June 2023

Organization of bimensual seminars with a focus on spatial and spatio-temporal statistics.

Amédée seminars

2020-2021

Organization of semestrial seminars with a focus on methodological development in fisheries science and marine ecology. [link](#)**WORKSHOP, COURSEWORK AND OTHERS**

Finist'R workshop

2024,2022,2020

Bootcamp of State Of the R group, organized by the MIA. Roscoff. [link](#)

Stats aux sommets, MIA Paris, visio

2021, 2024

Member of the SFDS.

GRANT

Grant for the international mobility of doctoral students

2021

Grant obtained from Ifremer for the mobility in 2021 at the DTU (Danemark).
