RESEARCH INTEREST

I am a quantitative ecologist and applied statistician with a specific interest in spatio-temporal modeling and applications in marine ecology. During my PhD, I developed statistical hierarchical models combining commercial catch declarations data and scientific survey data to infer fish spatio-temporal distribution and identify their essential habitats. Specifically, I developed methods to account for preferential sampling of commercial data and difference of spatial resolution between distinct data sources (change of support issues).

Since January 2023, I'm a post-doc fellow at the University of Washington (Seattle, USA) to develop spatio-temporal population dynamics models to project and address the effect of climate change on harvested population with the Snow Crab of the Bering Sea as case study.

CURSUS

Postdoc

January 2023 - present

University of Washington, School of Aquatic and Fishery Sciences and NOAA

Project 1

One-year contract

Subject: Modelling population dynamics processes in space to address climate change: Management Strategy Evaluation as framework.

Key words State-space model, mechanistic modelling, demographic processes, spatial statistics, climate change.

Supervisors: André Punt, Cody Szuwalski, Maxime Olmos.

Project 2

One-year contract

Subject: Inferring spatio-temporal patterns from multivariate ecological data.

Key words: Spatio-temporal statistics, multivariate analysis, hierarchical model, dimension reduction.

Supervisors: Jim Thorson, David Kimmel, Tim Essington.

PhD

2019 - 2022

Ifremer Nantes and Institut Agro (Rennes) - UMR DECOD

Subject: Inferring fish spatio-temporal distribution and identifying essential habitats: tackling the challenge of preferential sampling and change of support to integrate heterogeneous data sources. [link](#)

Key words: Spatial and spatio-temporal modeling, hierarchical model, data integration, preferential sampling, change of support, fisheries functional zones.

Supervisors: Youen Vermard, Marie-Pierre Etienne, Mathieu Woillez, Etienne Rivot.

Student mobility: DTU Aqua, Copenhagen, Danemark. Supervision of Kasper Kristensen. August - October 2021

MSc in fisheries science and quantitative ecology

2018 - 2019

Institut Agro (Rennes)

Master thesis

Ifremer Nantes - EMH Research Unit

Subject: Management Strategy Evaluation under stock structure uncertainty.

Application to the common sole in the Eastern English Channel. [link](#)

Supervisors: Sigrid Lehuta, Youen Vermard.

BSc in agriculture and food science

2016 - 2017

Institut Agro (Rennes)

Student mobility: Semester study at University College Cork, Ireland.

August - December 2017

SUPERVISORY EXPERIENCE

CDD Ifremer

January 2023 - June 2024

Subject: Packaging and applying spatio-temporal models to identify fish essential habitats for all French facades.

CDD employee: Juliette Casemajor.

Co-supervision with: Mathieu Woillez.

Master

May - July 2022

Subject: Contributions of the lognormal Poisson model for multivariate analysis of ecological communities. [link](#)

Student: Théo Fabien.

Co-supervision with: Marie-Pierre Etienne, Thomas Outrequin and Jean-Louis Marchand.

Master thesis

February - August 2021

Subject: Combining commercial and scientific data to infer the space-time distribution of sardine in the Bay of Biscay. [link](#)

Student: Florian Quemper.

Co-supervision with: Etienne Rivot and Marie-Pierre Etienne.

TEACHING

Introduction to spatio-temporal modeling for ecology (MSc)

2022

Institut Agro (Rennes), 10 hours. [slides](#) and [codes](#)

Student project in data science (MSc)

2020 - 2021

Institut Agro (Rennes), 24 hours.

Practical work in statistics for fisheries science (MSc)

2020

Institut Agro (Rennes), 20 hours.

Practical work in basics of probability theory (BSc)

2019 - 2020

University of Nantes, 24 hours.

PROJECTS AND WORKING GROUPS

The Alaska Climate Integrated Modeling Project (ACLIM) The Alaska Climate Integrated Modeling project (ACLIM) is an interdisciplinary collaboration to project and evaluate climate impacts on marine fisheries in the Bering Sea, Alaska. [link](#)

Head of the project: Kirstin Holsman (NOAA).

MACCO project: Identification of the target species and by-catch of the Bay of Biscay mixed fishery and evaluation of alternative management strategies. [link](#)

Head of the project: Stéphanie Mahévas (Ifremer Nantes).

EWG 22-01 - West Med closure areas (2022): working group aiming at identifying and evaluating the potential closure areas for the demersal species of the Western Mediterranean Sea.

Ifremer working group 'Science with and for society': working group aiming at evaluating the interactions between science and society within Ifremer. It led to several surveys among researchers, post-doctoral and doctoral students and to internal reports for the Ifremer scientific direction.

TECHNICAL SKILLS

Inference methods	Maximum likelihood inference, Bayesian inference
Languages	R, C++, Java, Python, SQL
Tools/Packages	Git, LaTeX, TMB, R-INLA, JAGS, Nimble, PostgreSQL

WORKSHOP, COURSEWORK AND OTHER CONFERENCES

Statistical Methods for Spatial Data, STAT 554, University of Washington. by John Wakefield.	2023
Annual meeting of the Mexico network, Irstea, Bordeaux	2022
Finist'R workshop	2022
Bootcamp of State Of the R, organized by the MIA. Biological station of Paimpont. link	
Stats aux sommets, MIA Paris, visio with an introduction to R-INLA and the SPDE approach by Thomas Opitz and Denis Allard.	2021
Finist'R workshop	2020
Bootcamp of State Of the R, organized by the MIA. Biological station of Roscoff. link	
Numerical methods for stochastic differential equation, Centrale Nantes by Marie Billaud-Friess.	2019 - 2020

GRANT

Grant for the international mobility of doctoral students	2021
Grant obtained from Ifremer for the mobility at DTU Aqua (Danemark).	

LAB AND DEPARTMENT COMMITMENT

Amédée seminars: organization of semestrial seminars with a focus on methodological development in fisheries science and marine ecology. 2020-2021. [link](#)

Space-time seminars: organization of bimensual seminars with a focus on spatial and spatio-temporal statistics. Since February 2023. [link](#) (the website is currently being updated)
