## Research Interests

Quantitative ecology and applied statistics, with a specific interest in statistical modeling of species distribution and population dynamics.

> *Key words:* statistical ecology, spatial and spatio-temporal statistics, species distribution, population dynamics, latent variable models.

## Positions & Education

- 2023– **Associate Professor of Statistics**, IUT Vannes, Université Bretagne Sud, Vannes, France.  
GEODATICS team, Lab-STICC (UMR 6285).
- 2023 **Postdoctoral Researcher**, University of Washington / NOAA, Seattle, USA.  
Species spatio-temporal modeling under climate change.
- 2019–2022 **PhD**, Ifremer / Institut Agro Rennes, France.  
Spatio-temporal species distribution modeling; hierarchical model, preferential sampling, change of support.
