Research Interests

I am an applied statistician and quantitative ecologist, with a specific interest in spatial and spatio-temporal statistics for ecology. My research aims at developing new and original statistical models to investigate species distribution and population dynamics in the context of climate change and threats on ecosystems.

> *Key words:* statistical ecology, hierarchical modeling, spatial and spatio-temporal statistics, species distribution, population dynamics, climate change.

Positions & Education

2023– **Associate Professor of Statistics**, IUT Vannes, Université Bretagne Sud, Vannes, France.
GEODATICS team, Lab-STICC (UMR 6285).

2023 **Postdoctoral Researcher**, University of Washington / NOAA, Seattle, USA.
Species spatio-temporal modeling under climate change.

2019–2022 **PhD**, Ifremer / Institut Agro Rennes, France.
Spatio-temporal species distribution modeling; hierarchical model, preferential sampling, change of support.

Selected Publications

- 2025 Alglave B., Mourguiart B., Vermard Y., Rivot E., Woillez M., Kristensen K., Etienne M.P. (2025). *Change of support for zero-inflated data: deriving fine scale species distribution inferences from spatially aggregated data*. Journal of the Royal Statistical Society Series C: Applied Statistics. [link](#)
- 2025 Michel M., Alglave B., Olmos M., Torterotot M., Virgili A., Martin-Marin S., Royer J.Y., Samaran F. (2025). *Modeling the influence of environmental factors on the acoustic presence of blue whale populations in the Southern Indian Ocean*. Scientific Reports (Nature). [link](#)
